Diagnostic

Tri Plaque ID Gel

Fast Application, Immediate Results.

Innovative plaque disclosing gel that identifies new, mature and acid producing biofilms. Contains sucrose and pigments (blue and red) that are able to penetrate and stain the plaque biofilm.

GC-TRIPLAQUEGEL Tri Plaque ID Gel 40gm Tube

Caries Detector

Aids in the excavation of the outer decalcified and infected carious dentin layer, permitting optimal caries removal. It also helps minimise the removal of remineralisable, healthy dentine, protecting the vitality of the pulp and, as a result, conserve maximal amount of healthy tissue. Fast and easy to use. Stains only non-remineralisable carious dentin. Helps clinicians to preserve healthy tissue.

KY-281220 2 x 6ml Bottles

Kuraray Noritake

Seek and Sable Seek Caries Indicator

Seek and Sable Seek identify demineralised dentin in difficult-to-see places - for example, under the overhanging enamel of class 1, 2 or 3 preparations, or along the DE junction of the preparation. Green Sable Seek helps prevent overextracting deep caries, which can lead to pulp exposure. Non-mineral dentin should be removed to improve the bond strength.

ULT-0233 Sable Seek Kit 4 x 1.2ml Syringes & 20 Tips
ULT-0234 Sable Seek Refill 4 x 1.2ml Syringes
ULT-0210 Seek Refill 4 x 1.2ml Syringes

ULTRADENT
PRODUCTS, INC.

Saliva Check Buffer Kit

Understand your patient's oral environment better with a Saliva Check Buffer kit.

GC's Saliva Check Buffer kit is divided into 5 different steps with the first 3 steps involving unstimulated saliva while the last 2 steps involve the stimulated saliva. The test results will become a very useful diagnostic aid and a powerful communication tool for patients.

- Checks the flow rate, viscosity and consistency of non-stimulated saliva. This will provide information about how the patient's lifestyle may be consequently affecting their oral health.
- Checks the pH of the patient's resting saliva. This will determine whether dangerously high acid levels are present which could potentially be causing erosion or caries
- Checks the quantity of stimulated saliva a patient can produce. This enables you to identify any major salivary gland diseases
- Checks the buffering capacity (quality) of stimulated saliva. This will establish the effectiveness of the saliva in neutralising acids in the mouth

GC-SALIVAKIT
Kit includes:
20 x In vitro pH test strips
20 x Saliva collection cups
20 x Wax for saliva stimulation
20 x Saliva dispensing pipette
20 x Buffer test strips.

KaVo DIAGNOcam

A Brilliant New Approach to Caries Detection!

KaVo DIAGNOcam is a portable detection device that uses patented transillumination technology to support the identification of occlusal, interproximal and recurrent carious lesions and cracks.

DIAGNOcam hugs the tooth and bathes it in safe, near-infrared light. In the resulting images, enamel appears transparent while porous lesions trap and absorb the light and appear as dark areas. This allows the clinician to see through the tooth exposing its structure and the actual structure of any carious lesions with very high accuracy.*

Learn more about this enlightening technology - request info or call today!

*Proximal dentin lesions represented in DIAGNOcam images correlate to the actual condition in the tooth with 99% accuracy. For DIAGNOcam indications visit www.kavousa.com

Pit & Fissure Sealants

Fuji VII EP

A clinically proven glass ionomer cement formulation now enhanced with RECALDENT™ (CPP-ACP) for superior protection and remineralisation. Ideal for fissure protection due to moisture tolerance during placement and the nature of the ion exchange adhesion between glass ionomer and enamel.

Fuji VII and Fuji VII EP create a strong, acid resistant, chemically-fused layer that will continue to give protection to the occlusal surface even when it appears visually 'lost' (eg as a result of attrition from the opposing dentition). The pink shade is especially useful when moisture control is difficult, as the setting reaction can be accelerated using a halogen curing light. The pink shade is also an excellent visual reminder that protection is in place.

GC-FUJI7PINKEP Pink, Box of 50
GC-FUJI7WHITEEP White, Box of 50

Guardian Seal

Fluoride-releasing pit and fissure sealant that provides superior protection against occlusal decay. This 30% filled material offers the perfect combination of flow, opacity and wear-resistance. Unlike most sealants, this product is opaque enough for detection yet translucent enough to allow the practitioner to see underneath.

KE-31169 4 x 1gm Syringes

Teethmate F-1

Fluoride-releasing, light-curing pit and fissure sealant material with strong adhesive properties. It is offered to simplify the "flow control" with a newly developed pin application system. The stable copolymer which releases fluoride is one of Kuraray's own inventions.

TEETHMATE™ F-1 is an unfilled composite of low viscosity that penetrates deep into pit and fissures so that the impairment of the antagonist is kept to a minimum. The balanced product formula of TEETHMATE™ F-1 includes the adhesive monomer MDP, which is also used in the resin cement PANAVIA™ F 2.0 and the bonding system CLEARFIL™ SE BOND 2. The special properties of the monomer MDP give TEETHMATE™ F-1 a genuine chemical adhesion and better retention on etched tooth enamel.

KY-282760 Clear Kit
2 x 2.5ml Syringe Resin
1 x 6ml K-Etchant Gel
50 x Disposable Brush Tips
Brush Tip Handle & 10 x Mixing Plates

KY-281912 Mixing Dish Pack of 25
KY-281919 Applicator Nozzle Pack of 25

Pit & Fissure Sealants

Conseal F

SDI

Combines the proven SDI sealant technology with an intensive initial fluoride boost in conjunction with long term fluoride treatment. The unique Conseal F filler component, with its blend of particles and high surface-to-area volume ratios, enables high fluoride release. Fluoride enhances caries prevention, remineralisation, and the inhibition of enamel demineralisation.

SD-7850012 Kit
3 x 1g Conseal f Syringes
1 x 1.25g Super Etch LV Syringe
20 x Disposable Syringe Tips

SD-7860000 Complet Refill, 20 x 0.06ml
SD-CONFR 5ml Bottle Refill
SD-CTIP Disposable Syringe Tips, Pack of 20

SDI Conseal Clear

SDI

Conseal Clear is the lowest viscosity sealant. The ideal low viscosity allows Conseal Clear to flow faster and deeper into the prepared pits and fissures. A recognised cause of pit and fissure sealant failure is an inability to seal. The tighter seal optimises Conseal Clear's mechanical retention and eliminates the space required for bacteria to grow. Conseal Clear's tight seal is further enhanced by its unique UDMA resin system's lower shrinkage and by being BIS-GMA free, avoiding the controversy of Bisphenol A.

SD-7850016 Kit
4 x 1g Conseal Clear Syringes
20 x Disposable Syringe Tips

SD-7850003 5ml Bottle Refill
SD-CTIP Disposable Syringe Tips, Pack of 20

Riva Protect

Riva Protect is the ideal product for caries-challenged patients – it adheres directly to the tooth, strengthens the underlying tooth structure and effectively seals the tooth from harmful bacteria and acids.

Riva Protect immediately guards the pits, fissures and tooth surfaces of partially erupted teeth from caries development. These teeth are the most vulnerable and moisture control can be difficult. Riva Protect's low viscosity allows it to quickly flow over surfaces and penetrate deeply into pits and fissures. A recognised cause of pit and fissure sealant failure is an inability to seal. The tight seal and self adhesive nature of Riva Protect optimises retention and eliminates the space required for bacteria to grow. Like all glass ionomer cements, Riva Protect chemically bonds to the tooth surface without the need of an adhesive. Riva Protect can be placed in a moist or dry environment.

SD-8680000 Pink - Regular Set, Box of 50 Capsules
SD-8685000 Pink - Fast Set, Box of 50 Capsules

SDI

Clinpro™ Sealant

3M
3M ESPE Dental

Light-cure, low viscosity, fluoride releasing pit and fissure sealant with a unique patented colour change feature. Clinpro™ sealant is pink when applied to the tooth surface, and changes to an opaque off white colour when exposed to light. The pink colour helps the dental professional with the accuracy and amount of material placed during the sealant procedure.

MD-12647 Kit: 1.2ml Syringe, 10 Syringe Tips
MD-12642 6ml Bottle
MD-12626T Disposable Syringe Tips, Pack of 10

Pit & Fissure Sealants

UltraSeal XT Plus

UltraSeal XT Plus is a light-cured, radiopaque, fluoride releasing composite sealant. It is stronger and more wear resistant because it is a 58%-filled resin and has less polymerisation shrinkage than competitive products.

The Spiral brush action of the tip causes shear thinning of the filled, thixotropic UltraSeal XT Plus reducing its viscosity as it is placed. The resin firms when shear thinning ceases and placement is complete, preventing it from running before it is cured.

Using Prima dry with UltraSeal XT plus enhances the UltraSeal XT plus's penetration into pits and fissures by eliminating moisture that can cause failure in hydrophobic sealants.

ULT-0563 UltraSeal XT Plus Clear Kit
Includes Ultra Etch, PrimaDry and 40 Tips

ULT-0726 UltraSeal XT Plus Opaque Refill x 4 Syringe
ULT-0727 UltraSeal XT Plus Opaque White Econo Refill

UltraSeal XT Hydro

UltraSeal XT Hydro is a light-cured, radiopaque, fluoride releasing composite sealant. It is stronger and more wear resistant because it is a 53%-filled resin and has less polymerisation shrinkage than competitive products.

The Spiral brush action of the tip causes shear thinning of the filled, thixotropic UltraSeal XT Hydro, reducing its viscosity as it is placed. The resin stops flowing when shear thinning ceases and placement is complete, preventing it from running before it is cured.

The Hydrophilic chemistry with its characteristic thixotropic nature chases moisture (that in hydrophobic sealants can cause sealant failure) deep into pits and fissures at a microscopic level. Once there, the advanced technology securely bonds the sealant to the enamel, increasing marginal retention and reducing microleakage

ULT-3532 UltraSeal XT Hydro
Opaque White Kit Including Etch & 40 Tips

ULT-3534 UltraSeal XT Hydro
Opaque White Econo 20 x 1.2ml Syringe

PrimaDry

PrimaDry is optimum for pit and fissure drying and preparation. It contains 99% organic solvents and 1% primer. PrimaDry rapidly volatilises moisture content of pits and fissures after rinsing off etchant with water spray and air drying. The ultrafine primer allows UltraSeal XT Plus to flow perfectly into every pit and fissure. It is also useful prior to placing composite repairs. Do not use on dentine.

ULT-0716 PrimaDry Refill - 4 x 1.2ml PrimaDry Syringes
ULT-0717 PrimaDry Econo Refill - 20 x 1.2ml PrimaDry Syringes

Toothbrushes - Power

Spiderman & Barbie

Small Oscillating head with extra soft bristles to gently sweep away plaque. Easy on/off buttons, replaceable AAA batteries. Brush lays flat for easy toothpaste application.

CG-1224416 Spiderman/Barbie Toothbrush Pkt 6

CG-1225646 Teenage Ninja Turtles Toothbrush Pkt 6

360° Optic White

Unique head system with vibrating and polishing bristles. 20,000 strokes per minute to help whiten teeth and remove stains.

CG-1224694 360° Optic White Pkt 6

Plaque Defence

Offers superior plaque removal at the push of a button.

Modes

- Clean: For exceptional everyday clean

Cleaning performance

- Speed: Up to 31,000 brush strokes/min
- Performance: Removes up to 6 x more plaque
- Health Benefits: Helps reduce cavities
- Timer: Smartimer to help achieve brushing for two minutes

Ease-of-use

- Brush Head System: Easy snap-on brush heads
- Brushing Time: Up to 2 weeks
- Battery Indicator: Light shows battery status
- Handle: Slim ergonomic design

Technical specifications

- Battery Type: NiMH

Service

- Warranty: 2-year limited warranty

Toothbrush - Manual

Smiles My First Toothbrush 0-2 Years

My First is designed to effectively clean deciduous teeth whilst gently protecting soft tissue.

CG-183900529 My First Colgate
Toothbrush x 8

Smiles Junior 2+ Years Dora/Diego

Smiles Junior is designed to thoroughly and gently remove plaque from even difficult to reach posterior teeth.

Dosing dot helps measure the correct amount of paste at each stage (my first, smiles junior and smiles youth).

Includes suction cap for easy and fun upright storage.

CG-1223442 Dora/Diego x 8

Smiles Youth 6+ Years Minions

Smiles Youth is designed to effectively clean teeth at the mixed dentition stage, together with introducing the tongue cleaner.

Includes suction cap for easy and fun upright storage.

CG-CN05458A Minions x 8

Bright Smiles, Bright Future

Cello wrapped unisex brush with raised tip for cleaning hard to reach back teeth.

CG-1051620 Child Toothbrush
Bulk Pack of 72

360° Sensitive Pro Relief

Softer bristles to reduce toothbrush abrasion. Soft rubber polishing cups gently remove surface stains

CG-1223813 Colgate 360 Sensitive Pro Relief x 8

Total Professional Ultra Compact

Triple action bristles to effectively remove plaque on smooth surfaces, between teeth and at the gingival margin.

CG-1223901 Total Professional Ultra Compact x 6

Toothbrush - Manual

V-Trim Ortho

Ortho V-Trim bristle system, cleans teeth in and around braces and other orthodontic appliances.

CG-183901153 Colgate V-Trim Ortho Pkt 12

360° Ultra Compact Head

Tightly packed, tapered bristles reach interproximally and along the gingival margin to remove plaque. Raised cleaning tip provides better access to posterior areas of the mouth.

CG-183901240 360 Ultra Compact Head Pkt 12

Slimsoft Ultra Compact Head

17 x slimmer, floss-tip bristles for a deep clean. High density of bristles for a thorough cleaning experience and unique mouth feel.

CG-183901785 Colgate Slimsoft Ultra Compact Head Pkt 12

Toothpaste

My First Toothpaste

My First is a low fluoride, mild flavour and low foaming formula for increased compliance. 500ppm Fluoride.

CG-1537001 My First Toothpaste 45gm Pkt 12

Dora The Explorer

Sodium fluoride reduces caries by inhibiting demineralisation and promoting remineralisation of the tooth surface. Mild bubble fruit flavour for increased compliance. 1100ppm Fluoride.

CG-1225384 Colgate Dora The Explorer Toothpaste 130g Pack of 12

Sparkling Mint Gel 6+Years

Sparkling mint gel is clinically proven protection against cavities. Colgates fluoride formula strengthens tooth enamel, leaving children's teeth harder and more resistant to cavities. Mild flavour, 1000ppm Fluoride.

CG-TH2048A Sparkling Mint Gel Toothpaste (6+Yrs) 110g Pkt 12

Maximum Cavity Protection Junior

Unique technology fights sugar acids in plaque, reduces demineralisation + reduces early decay by half. It also strengthens and restores the enamel to help prevent cavity formation. Clean mint flavour, 1450ppm Fluoride.

CG-1225645 Maximum Cavity Protection SAN Junior 80g Box of 12

Total Toothpaste

Unique triclosan/copolymer formula helps prevent plaque bacteria reappearing for up to 12 hours by creating a protective barrier around your teeth and gums. Original mint flavour, 1450ppm Fluoride.

CG-1223648 Colgate Total Toothpaste Box of 12 x 110g Tubes
CG-1537133 Colgate Total Toothpaste Box of 24 x 45g Tubes

Total Advanced

Clinically proven to provide a more effective level of plaque control compared to a regular fluoride paste. Clinically proven to reduce plaque by up to 98% and reduce gingival bleeding by up to 88%. 1000ppm Fluoride.

CG-1538111 Colgate Total Advanced Toothpaste 110gm Box of 12

Toothpaste

Optic White Enamel White

Optic White 1% hydrogen peroxide paste intensively dissolves stains and gently polishes tooth surfaces. Whitens more than 3 shades, results start in just 1 week. 1450ppm Fluoride.

Colgate®

CG-1225530 Colgate Optic White Enamel White Toothpaste 95g Pkt 12

Sensitive Pro-Relief™ Repair & Prevent

Colgate®

Sensitive Pro-Relief Repair & Prevent, with Pro-Argin® technology, repairs sensitive areas of teeth and prevents further sensitivity. It also strengthens gums to help prevent gum recession. Added Zinc for antibacterial action. 1450ppm Fluoride.

CG-1224865 Sensitive Pro Relief Repair & Prevent 50g Toothpaste Pkt 12

Sensitive Pro-Relief™ Multi-Protection

Colgate®

Formulated with arginine and insoluble calcium to repair and protect exposed, sensitive areas of the teeth. Provides instant relief and longlasting protection. Provides superior and effective enamel remineralisation. 1450ppm Fluoride.

CG-1224940 Sensitive Pro Relief Multi Protect 110g Box of 12

Speciality Toothpastes

Neutrafluor 5000+

Colgate®

Maximum strength fluoride toothpaste for high risk caries patients. To be used daily in place of other toothpaste. Provides extra protection needed during orthodontic treatment. Freshmint flavour, 5000ppm Fluoride.

CG-1224396 Neutrafluor 5000+ 56gm

Neutrafluor 5000 Sensitive

Colgate®

Maximum strength fluoride toothpaste for high risk caries patients. Potassium nitrate for effective sensitivity relief. Helps to protect exposed root surfaces from decay. Freshmint flavour, 5000ppm Fluoride.

CG-12247541 Neutrafluor 5000 Sensitive Toothpaste 115g

3M Clinpro™ Tooth Crème

3M

Clinpro™ Tooth Crème 0.21% w/w (950 ppm fluoride ion) Sodium Fluoride Anti-Cavity Toothpaste is an advanced formula containing an innovative tri-calcium phosphate ingredient. Contains fluoride as well as calcium and phosphate, which are components naturally found in saliva.

- Strengthens teeth
- Reverses white spots
- Prevents cavities
- Reduces root cavities
- Gentle, effective cleaning
- Replaces conventional toothpaste regimen

MD-12216 Clinpro Tooth Creme Vanilla Mint 113g Tube

Oral Probiotics

M18 ToothGuard

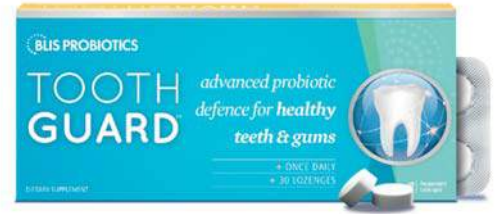

BLIS M18™ is a new generation of advanced oral probiotics, developed from a special strain of beneficial bacteria called *Streptococcus salivarius* that is found to occur naturally in the healthy mouths of adults and children.

ToothGuard with BLIS M18 has been scientifically developed to support the health of teeth and gums when used in conjunction with regular brushing.

BLIS M18 works in 2 ways:

1. The “good” bacteria (BLIS M18) crowd out the bad bacteria responsible for cavities and gum disease.
2. BLIS M18 also inhibits bad bacteria, providing protection against them coming back. Think of it as a ‘force-field’ around your oral cavity.

BL-TG Adults
BL-TGJ Junior

K12 Fresh Breath Kit

One of the most common causes of bad breath or Halitosis is due to the existence of bacteria in our mouth. Even if you brush and floss teeth daily, food particles can remain in your mouth, promoting bacterial growth between teeth, around the gums, and on the tongue. As bacteria break down food particles, they can release unpleasant smelling gas. If this is in high concentrations, those odours are detectable by other people as bad breath.

Brushing teeth and using anti-bacterial mouthwash will eliminate some of the bacteria and mask the odour for a short time but for halitosis, a more thorough approach is required to get the balance of bacteria right.

BLIS K12™ for Oral Health and Breath Support

FreshBreath kit contain BLIS K12™ - an advanced probiotic strain of *Streptococcus salivarius*. BLIS K12™ is proven to prevent bad breath by crowding out the bad smelling bacteria and promoting healthy bacteria in the mouth.

It works in 2 ways:

1. The ‘good’ bacteria crowd out the ‘bad’ bacteria that cause halitosis
2. The ‘good’ bacteria (*S. salivarius* K12) produce bacteriocins that provide protection against the bad bacteria coming back: think of it like a forcefield around your oral cavity.

BLIS FreshBreath™ Kit is clinically researched to promote and maintain fresh breath - not temporarily mask it. With a combination of BLIS K12™ lozenges, high-strength anti-bacterial mouthwash and a tongue cleaner, this easy to follow 4 week program will significantly improve breath odour for halitosis sufferers.

BL-FBK Fresh Breath Kit

Mouth Rinse

Savacol

Antiseptic chlorhexidine mouth and throat rinse. Savacol aids in the treatment of gingivitis and may relieve discomfort of mouth ulcers. Available in Mint (2mg) Freshmint (1.28mg) and Alcohol Free (2mg).

CG-1223207 Original (Green), 3L Bottle
 CG-1224451 Original (Green), Pack of 4 x 300ml Bottles
 CG-1224452 Freshmint (Blue), Pack of 4 x 300ml Bottles
 CG-1224463 Alcohol Free, Pack of 4 x 300ml Bottles

Plax

Antiseptic rinse which fights plaque and bacteria for up to 12 hours. Plax has a great refreshing taste and provides long lasting fresh breath.

CG-1525329 Plax Freshmint Alcohol Free Green, 500ml Pack of 4
 CG-1525330 Plax Gentle Care Alcohol Free Pink, 500ml Pack of 4
 CG-1525391 Plax Freshmint Alcohol Free 60ml Pack of 12

Dry Mouth Relief

Contains sodium fluoride to help reduce the increased caries risk of dry mouth sufferers. Soothing relief, Alcohol free and SLS free. Dry Mouth Relief has a great taste and mild flavour.

CG-1224755 Colgate Dry Mouth Relief 473ml Pack of 6 bottles

Peroxyl Oral Cleanser

Oral antiseptic mouth wash with a unique oxygenating cleansing action. For all patients as a cleanser in the symptomatic relief of minor mouth and gum irritations such as gum inflammation and mouth ulcers. Active ingredient Hydrogen Peroxide 1.5%

CG-1225477 Peroxyl Oral Cleanser Alcohol Free 236ml Box of 6 Bottles

Octenidol® md

Features

- For decontamination of unwanted germs
- No discolouration of teeth
- Chlorhexidine-free
- For patients with impaired ability to perform oral hygiene measures
- Support of oral hygiene before and after periodontal- and oral-surgical interventions
- Prevention and avoidance of mouth odour
- Reduction of odour producing bacteria in the oral cavity

SK-OCTEN250ML Octenidol md 250ml

Mouthrinse Concentrate

An alcohol-free, Spearmint flavoured concentrate mouth rinse for the treatment of minor oral infections such as mouth ulcers and gingivitis.

HS-MCS200 200ml

Chlorhexidine Rinse

An alcohol-free concentrate mouth rinse for the treatment of minor oral infections such as mouth ulcers and gingivitis, and in the maintenance of oral hygiene. Coats all areas of the mouth tissue to ensure a long-lasting antiseptic effect for up to 8hrs.

CP-478547 Chlorhexidine Mouth Wash 0.2% 200ml

Interdental

Dental Ribbon

Helps to protect gums and reduce tooth decay by removing plaque between teeth and along the gum lines. Slides easily between teeth without shredding. Mint flavour to help freshen your mouth.

CG-1221707 Total Ribbon Waxed Mint 25m/6
CG-1223071 Total Dental Ribbon Mint 137m
CG-1224406 Total Sample Ribbon Mint /72

Dental Ribbon Tartar Control

Helps to protect gums and reduce tooth decay by removing plaque between teeth and along the gum lines. Tartar control is impregnated with pyrophosphate which plays a role in inhibiting calculus formation.

CG-1222780 Total Dental Ribbon Tartar 25m Pack of 6

Multifloss

- The stiff end enables easy insertion of the floss, while the thick, spongy part and the thin nylon part allow effective cleaning of interdental spaces of varying size
- The thicker part is also suitable for plaque removal in the tricky areas around orthodontic appliances, bridges and implant constructions

CY-84455 Multifloss Pack of 100

Bridge & Implant Floss

- Thick, flexible floss specially designed for cleaning of implants, bridges and orthodontic appliances and periodontal care
- The floss is equipped with stiff plastic ends for easy insertion

CY-84450 Bridge & Implant Floss Pack of 30

EasyPick™

TePe EasyPick™ is the easy and efficient way to clean between teeth, leaving the mouth fresh and healthy. Use every day, anytime, anywhere!

TePe EasyPick™ is recommended for:

- Patients that find it difficult to use dental floss
- Patients with small and large spaces
- Patients with braces and implants

CY-84311 M/Large Turquoise Pack of 36
CY-84320 XS/Small Orange Pack of 36

Floss Threader

Take the difficulty out of cleaning around bridges, braces, and implants. Simple loop fits any type of floss. Flexible tip inserts into small spaces in a snap.

DT-FT3606 FT2506 Floss Threader 75ct, Bag of 6

Interdental

Complete Clean Back Teeth Floss Picks

Conquer tight spaces even between the hardest to reach back teeth. DenTek Complete Clean Back Teeth Floss Picks combine super tough floss with an extended handle to reach and clean between back teeth. Don't neglect your back teeth because they are hard to reach. DenTek Complete Clean Back Teeth Floss Picks are the solution for tight spaces anywhere in the mouth:

- Extended handle easily reaches back teeth
- Break proof scrubbing floss
- Bristled pick brushes deep between teeth
- Minty flavour that leaves your mouth feeling fresh

DT-CP2155 Complete Clean Easy Angle Floss Picks 75ct, Bag of 6

Comfort Clean Floss Picks

Gentle on teeth and gums, tough on food and plaque. DenTek Comfort Clean Floss Pick's silky floss tape is gentle on teeth and gums while comfortably removing food and plaque. Clinically proven as effective as rolled floss! Flossing is important to the health of your teeth and gums.

DenTek's Comfort Clean Floss Picks make it comfortable and easy:

- Ultra thin Silky Comfort Floss Tape that slides smoothly between teeth
- Minty flavour that leaves your mouth fresh
- Textured Pick that deep cleans between teeth and stimulates gums
- Tongue Cleaner that fights bad breath

DT-CC0809 Comfort Clean Floss Picks 30ct Box of 6

Interproximal Brushes

Interproximal tooth cleaning brushes with high wire strength for excellent durability. Curved shape allows for easy insertion in molar interdental spaces without bending wire. Handle shaped for easy backward and forward cleaning motion. Antibacterial resin used for the construction of the brush and handle. Available in 3 brush head sizes.

GC-BRUSHASST Interproximal Brush Asst /20

PHILIPS
sonicare

Philips Airfloss Ultra

Designed for inconsistent flossers.

For those who don't floss consistently, AirFloss Ultra is the easiest way to effectively clean between teeth. AirFloss Ultra can be used with mouthwash or water and is clinically proven as effective as floss for gum health.

Improves oral health

- Clinically proven as effective as floss for gum health
- Up to 99.9% plaque removal
- Helps prevent cavities between teeth

Superior technology

- Air and micro-droplet technology
- High performance nozzle
- Triple burst customisable settings

The easiest way to effectively clean between teeth

- Takes just 60 seconds: Point, Press, Clean!
- Total daily confidence of a fresh and clean mouth
- An easy way to start a healthy habit

Micro-droplet technology

Our clinically proven results are possible from our unique technology that combines air and mouth rinse or water to powerfully yet gently clean between teeth and along the gumline.

High performance nozzle

The new Airfloss Ultra high performance nozzle amplifies the power of our air and micro-droplet technology to be more effective and efficient than ever.

PH-HX8381-01 White
PH-HX8431-03 Black

Philips Airfloss Nozzles

The AirFloss nozzle was designed to optimise user technique. The guidance tip makes it easy to find the spaces between teeth and to place the tip at the appropriate horizontal angle for maximum cleaning. It is recommended that you replace the nozzle every six months to prevent hard water build-up and reduce the potential risk of bacteria build-up.

PH-HX8012 Nozzle Twin Pack

PHILIPS
sonicare

Philips Airfloss Ultra Nozzles

The angled shape of the nozzles makes it easier to reach hard to reach areas in your mouth. For positioning purposes thanks to its gliding tip, the nozzles can be positioned easier in between the teeth. Printed droplets on each nozzle make it easy to identify nozzles when sharing the device between two people. Easy snap on and off nozzle system.

Specialty Treatment Products

Fluoride Varnish

Duraphat Lite

In-office protection against caries and hypersensitivity relief in primary and permanent teeth.

- High fluoride concentration 22,600ppm F(NaF) for long term caries protection
- High adhesion even on moist surfaces for quick and easy application
- Banana flavoured for enhanced patient acceptance
- Light colour

CG-1224347 10ml Tube

Duraphat Single Dose

- High fluoride concentration 22,600ppm F (NaF) for dentine hypersensitivity relief
- High adhesion even on moist surfaces for quick and easy application
- Raspberry flavour for enhanced patient acceptance
- Application control
- White finish

CG-733853 0.4ml Doses, Box of 50

Clinpro™ White Varnish

5% Sodium Fluoride - Single Dose

3M™ Clinpro™ White varnish is a fluoridated clear varnish for treatment of hypersensitive teeth; it is appropriate for use on both enamel and dentin. It is moisture and saliva-tolerant; consequently, it flows smoothly on moist teeth and binds firmly to their surfaces. The treatment may be applied after routine professional tooth cleaning or scaling and rootplaning. However, this is not a prerequisite: the area to be treated only needs to be "toothbrush clean".

MD-12249 0.5ml Doses, Box of 50
MD-12250 0.5ml Doses, Box of 100

Clinpro™ XT Varnish

Clinpro™ XT Varnish is a site-specific, light-cured, durable, fluoride-releasing coating that provides an immediate layer of protection to relieve dentinal hypersensitivity.

- Great for protecting exposed, sensitive root surfaces, especially newly cleaned surfaces following scaling and root planing
- Remains on the tooth for 6 months or longer
- Moisture tolerant: no need to dry or pre-treat the root surface
- Does not require the use of a rubber dam

MD-12248 10g Clicker each

CavityShield

5% Sodium Fluoride - Single Dose

CavityShield™ 5% Sodium Fluoride Varnish is a traditional fluoride varnish. 3M ESPE produced the world's first Unit-dose Varnish CavityShield. Contains 22,600 ppm fluoride and is yellow in colour. It enhances aseptis and comes in 2 dose sizes.

- Treating high risk caries patients
- Treating hypersensitive teeth

MD-12140 0.25ml, Box of 200, Bubblegum Flavour
MD-12141 0.40ml, Box of 200, Bubblegum Flavour

Specialty Treatment Products

Dry Mouth Gel

GC Dry Mouth gel is specifically designed to ease symptoms in patients with impaired production of saliva. GC Dry Mouth Gel forms a long lasting coating over the teeth, has a neutral pH and a pleasant taste. Indicated for mouth breathers whilst sleeping, people with drug induced dry mouth from OTC and other prescription medications, Sjogren's syndrome, Patients' undergoing radiation treatment and patients' suffering from diabetes and long term xerostomia. It is recommended for patients with little or no saliva who have an imbalance in the ions needed for protecting dental hard tissues. Dry Mouth Gel soothes the symptoms of oral dryness. It does not boost the levels of bio-available calcium, phosphate and fluoride ions. To overcome this GC Tooth Mousse or Tooth Mousse Plus can be used in combination with Dry Mouth Gel especially at night.

GC-DRYMOUTHGEL10 Box of 10

Dry Mouth Relief

Contains sodium fluoride to help reduce the increased caries risk of dry mouth sufferers. Soothing relief, Alcohol free and SLS free. Dry Mouth Relief has a great taste and mild flavour.

CG-1224755 Colgate Dry Mouth Relief
473ml Pack of 6 Bottles

Neutrafluor 900 Rinse

900ppm Fluoride weekly rinse for moderate to high caries risk patients. NeutraFluor 900 increases tooth resistance to acid dissolution, promotes remineralisation and inhibits the cariogenic microbial process. Safe for use with ceramics and glass based restorations. Easier compliance for some patients compared to daily rinse regime.

CG-1224346 Pack of 4 Bottles

Neutrafluor 220

220ppm Fluoride daily rinse for prevention of root and enamel caries. NeutraFluor 220 is safe to use with ceramics and glass based restorations. Popular product used during orthodontic treatment. Mint flavoured and alcohol free.

CG-1224748 Pack of 6 Bottles

Tooth Mousse Plus

Bio-Available Calcium, Phosphate and Fluoride Water based, sugar free dental topical crème containing RECALDENT (CPP-ACP) (Casein Phosphopeptide - Amorphous Calcium Phosphate) and fluoride

Advantages:

All the benefits of GC Tooth Mousse, with 900ppm of a unique, patented form of fluoride in a product designed for high-risk patients

Indications:

For patients who suffer from aggressive caries and loss of tooth structure, from dental erosion and accelerated tooth wear following head and neck radiotherapy

- For pregnant women during and/or after orthodontics
- For patients with an acidic oral environment and gastric reflux
- For patients with poor plaque control and high caries risk

GC-TMPLUSMINT Mint, Pack of 10
GC-TMOUSSEPLUS Assorted, Pack of 10

Recaldent Chewing Gum

Recaldent® sugar free gum is recommended for patients with increased risk of caries or erosion. Contains RECALDENT™ (CPP-ACP) which helps repair and rebuild enamel by replacing the calcium and phosphate lost through acid attack. Contains sugar free ingredients that help reduce the level of decay-causing bacteria. Chewing will stimulate saliva flow to help neutralise the damage caused by acids in the mouth.

GC-RECALMINTJAR Pack of 6 Jars
GC-RECALMINTJAR1 Single Jar, 112 Pellets

Specialty Treatment Products

Tooth Mousse

Water based, sugar free dental topical crème containing RECALDENT CPP-ACP (Casein Phosphopeptide - Amorphous Calcium Phosphate), RECALDENT (CPP-APP) is derived from the milk protein, casein. For many years it has been known that milk and its derivatives have a tooth protective effect. Recently, research has shown that this activity is due to a part of the casein protein called Casein Phosphopeptide (or CPP), which carries calcium with phosphate ions 'stuck' to it, in the form of Amorphous Calcium Phosphate (or ACP). This complex of CPP-ACP (RECALDENT) is an ideal delivery system for bio-available calcium and phosphate ions. The first product for professional use that contains RECALDENT (CPP-APP) technology is GC Tooth Mousse. GC Tooth Mousse incorporating RECALDENT (CPP-APP) promises to make an important contribution to protecting the oral environment in a wide range of situations where a mineral imbalance may arise.

Advantages:

- Delivers RECALDENT (CPP-APP) to restore mineral balance in the oral environment
- Provides extra protection for teeth
- Helps neutralise acid challenges from acidogenic bacteria in plaque and other internal and external acid sources
- Tastes delicious and makes teeth feel smoother and cleaner

Indications:

- Restoring mineral balance in patients with salivary deficiencies such as xerostomia or when proper oral hygiene procedures are difficult
- Restoring balance after procedures such as tooth whitening, professional cleaning, rootplaning and curettage, as well as reducing any resulting dentin hypersensitivity
- Research has also shown that RECALDENT (CPP-APP) can transform the visual opacity of new white spots to a more natural 'tooth-like' translucency

When GC Tooth Mousse is applied to tooth surfaces, the CPP-ACP molecule binds to biofilm, plaque, bacteria, hydroxyapatite and surrounding soft tissue localising bio-available calcium and phosphate. Saliva enhances the effectiveness of CPP-ACP and the flavour helps stimulate saliva flow. Tooth Mousse works quickly, within 2-5 minutes, but the longer CPP-ACP is maintained in the mouth the more effective the result.

Universal Dentin Sealant

For Transient Root Sensitivity

Features

- Immediate relief - ideal following scaling and root planning
- Economically priced
- Quick application - just paint and dry

Ultradent Universal Dentin Sealant is a biocompatible, nonpolymerisable, high-molecular-weight resin in a volatile organic solvent. Simply coat sensitive roots or exposed dentin with Ultradent Universal Dentin Sealant to seal tubules and reduce discomfort after root planing or heavy scaling. A virtually impenetrable barrier remains for months after application.

ULT-0266 Universal Dentin Sealant Refill 4 x 1.2ml Syringes

Perio & Prophy Handpieces

Perio-Mate BioFilm Eraser

Perio-Mate is used in the treatment of periodontal pockets and peri-implantitis. Avoiding injury to the soft tissues and root surfaces inside delicate periodontal pockets during cleaning procedures is crucial.

The Perio-Mate ultrafine water spray and glycine-based Perio-Mate Powder match to gently eradicate biofilm in periodontal pockets in just 20 seconds. The combination of Perio-Mate slim nozzle and fine, thin and flexible plastic nozzle tips make procedures safer while offering optimal visibility.

Air-n-Go® easy Portable Air Polisher

ACTEON® EQUIPMENT has created the new generation of portable air polishers, AIR-N-GO® easy with dual functions:

- "SUPRA function" for supra-gingival polishing: daily prophylactic polishing
- "PERIO function" for sub-gingival polishing: maintenance, periodontal and peri-implant treatments

This medical device allies simplicity with performance

A Single Handpiece to Cover a Range of Care and Treatments

AIR-N-GO® easy combines essential functions with reliability to facilitate your everyday life:

- Fast start-up: direct connection to the high speed handpiece connector
- Greater freedom of movement: 360° rotation, fast and accurate treatment of areas requiring care
- Easier cleaning of the handpiece: main parts can be dismantled

S5-F101__ Air-n-Go® easy

Air polishing is becoming even simpler with

Sodium bicarbonate-based AIR-N-GO® powders have been specially designed and studied to produce an effective treatment that is gentle on all treated surfaces.

- Complete range of supra-gingival powders which meet your patients' preferences
- Scrupulous cleaning giving instant results
- Action of removing coloured stains and bacterial plaque, even in areas that are difficult to access
- Better treatment acceptance: less bleeding and pain felt by the patient

100% NATURAL FRESHNESS!

S5-F102___ 5 fresh flavours based on 100% natural aromas or essential oils: Neutral, Cola, Raspberry, Peppermint and Lemon.

HAW-978-30	Prophy Brush Snap On Normal	Pack of 30

Pro-Cup®

The latex-free Pro-Cup® range permits the economical, splash-free application of prophy-paste. Thanks to its unique lamellar inner and outer profile, Pro-Cup impels the prophy-paste and saliva towards the edge of the cup on a helical principle. In this way the formation of a splash-ball is avoided and the prophy-paste is continually carried in the direction of the teeth, hence reducing heat through friction. Available in a soft (light blue) and a hard (dark blue) version.

HAW-990-30	Pro-Cup Soft R/A	Pack of 30
HAW-991-30	Pro-Cup Hard RA	Pack of 30
HAW-1810-120	Pro-Cup Screw Type	Pack of 120
HAW-1811-30	Pro-Cup Hard Screw	Pack of 30

Pro-Cup® Junior

Pro-Cup® Junior is especially suitable for use in children or small oral cavities.

HAW-992-30	Pro Cup Junior Latch,	Pack of 30

Prophy Paste

HS-HPPP01 Medium Grit Spearmint 200g
 HS-HPPP02 Medium Grit Bubble Gum 200g
 HS-HPPP03 Medium Grit Fruit Tingle 200g

Cleanic® Prophy Paste

Cleanic® is a universal prophy paste with integrated cleaning variability. It accomplishes efficient initial cleaning and subsequent high polishing in one session. During the initial seconds of use, Cleanic exerts a high cleaning power that converts into a gentle polishing action as the Perlite particles fragment. The perlite technology turns Cleanic into a unique paste, which combines high cleaning power, polishing of dental surfaces and gentleness to hard tissue all in one. With the use of one single paste treatment time is significantly reduced.

HAW-3140 Cleanic Prophy Paste Single Dose 2g, Pack of 200 Pots
 HAW-985 Ring Pots, Pack of 100 Pots

Prophy Paste

A spearmint flavoured prophy paste ideal for cleaning and polishing the teeth. The splatter-free formula offers enough initial abrasion to remove discolourations and stains, and will gradually become less coarse in the mouth to facilitate final polishing of the tooth surface. Ideally suited for use in conjunction with rotary bristles, brushes or rubber prophy cups.

A1-000P078 200g

Ultrapro Tx Prophy Paste

- Contains 5% potassium nitrate and 1.23% fluoride ion
- Splatter-free formula
- Comes in a variety pack containing the following flavours: Walterberry, Orange Dreamsicle and Mint
- Rinses easily and completely to eliminate residual grittiness
- Gluten-Free

ULT-8327 2g Cup Variety Medium Grit, Pack of 200

Scalers & Tips

SONICflex 2003 L Optic Air Scaler Set

Your KaVo SONICflex is the Most Powerful and Quietest Air Scaler of its Class!

You won't fail to be impressed!

The KaVo SONICflex is a high quality MULTIflex-fitting scaler ideal for a wide range of applications.

- Prophylaxis
- Endodontics
- Periodontics
- Minimally invasive caries therapy
- Surgery

SONICflex 2003 L Air Scaler Set

Contains: 1 x SONICflex Scaler

1 x Torque Wrench

1 x SONICflex Scaler Tip Set

Includes:

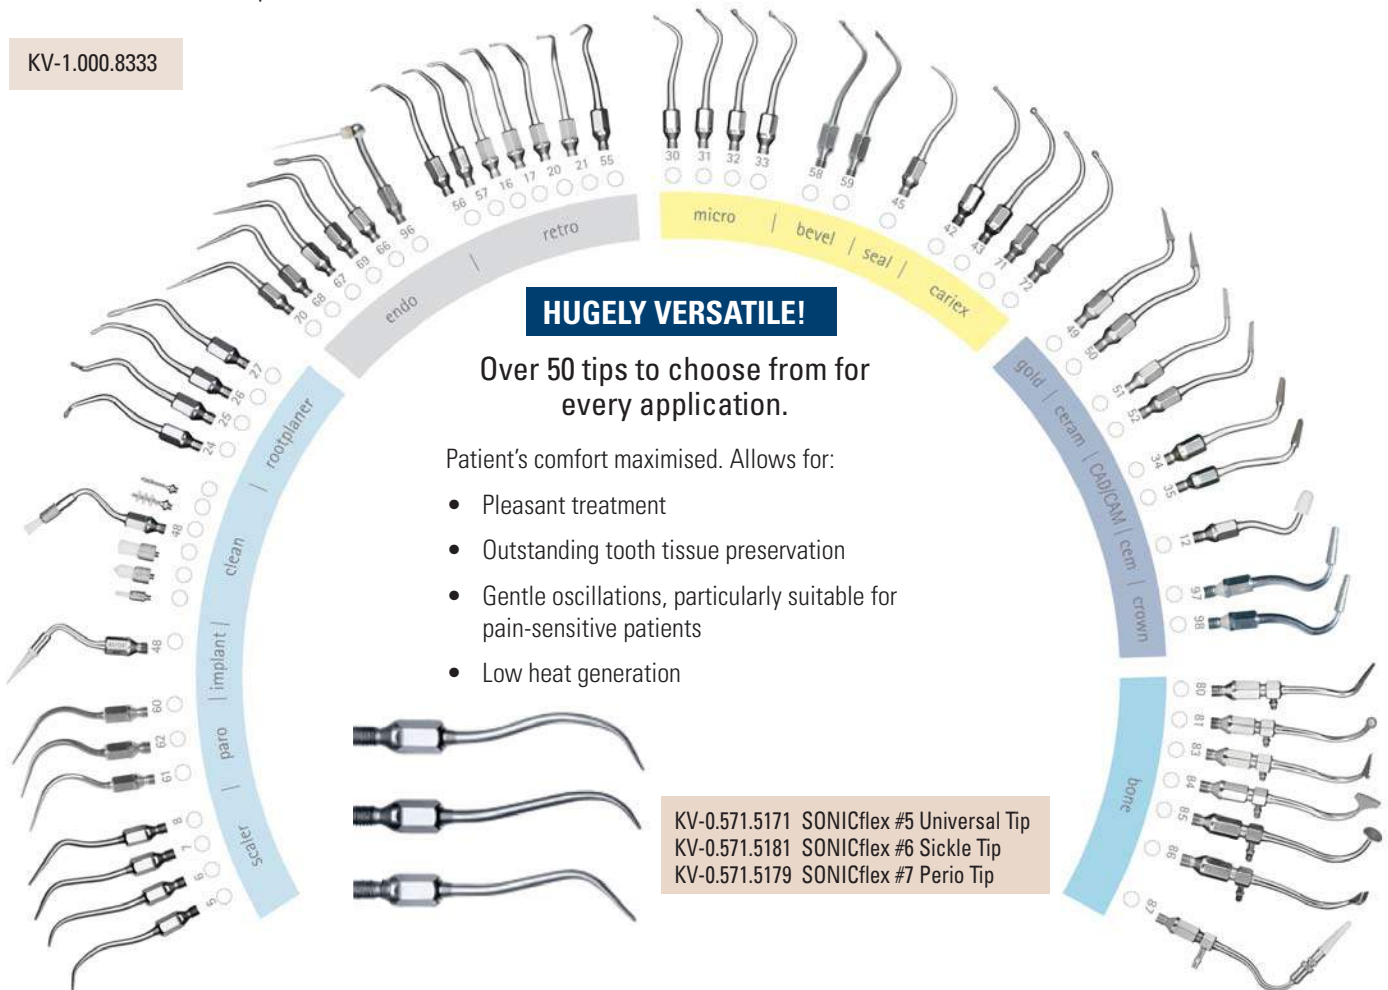

1 x Universal (#5)

1 x Sickle (#6)

1 x Perio (#7) Tips

Scalers & Tips

Varios Series iPiezo Scalers provide outstanding performance and versatility for General Scaling, Perio, Restorative, Endodontic and Maintenance applications.

Traditional NSK precision technology transforms the power and versatility of Piezo Scalers. Presenting the NSK Varios series, available with twin LED shadowless illumination as an option.

The NSK iPiezo engine assures stable power output by automatically adjusting to the optimal frequency as the sensor monitors the load at the tip.

Varios 170

Integrated Multi-Function Ultrasonic Scaler.

The smallest module for easy integration into new and existing dental equipment.

Features:

- Frequency: 28-32 KHz
- Maximum output: 11 W
- Module dimensions: W63 x D54 x H26 (mm)

NK-Y1001352 Varios 170 Non-Optic Complete Set
NK-Y1001351 Varios 170 Optic Complete Set

*Installation not included. Technicians required for installation.

Varios 970

Portable Multi-Function Ultrasonic Scaler.

For optimum clinical versatility.

Features:

- Frequency: 28-32 KHz
- Maximum output: 11 W (G mode)
- Module dimensions: W160 x D260 x H80 (mm)
- Bottle volume 400mL (x 2 bottles)
- Water connection optional

NK-Y1001175 Varios 970 Non-Optic Complete Set
NK-Y1001168 Varios 970 Optic Complete Set

Varios 570

Benchtop Multi-Function Ultrasonic Scaler.

Features:

- Frequency: 28-32 KHz
- Maximum output: 11 W
- Module dimensions: W63 x D54 x H26 (mm)

NK-Y1001756 Varios 570 Non-Optic Complete Set
NK-Y1001746 Varios 570 Optic Complete Set

Varios 370

Benchtop Multi-Function Ultrasonic Scaler.

Features:

- Frequency: 28-32 KHz
- Maximum output: 11 W (G mode)
- Module dimensions: W80 x D135 x H65 (mm)
- Portable but compact enough to attach quickly and easily to any chair unit.

NK-Y1001391 Varios 370 Non-Optic Complete Set
NK-Y1001388 Varios 370 Optic Complete Set

Scalers & Tips

BioSonic US100R Ultrasonic Scaler

COLTENE

**2 YEAR
WARRANTY!**

- BioSonic magnetostrictive Ultrasonic Scaler System accommodates both 25 kHz or 30 kHz inserts
- Lower power range keeps patient's comfort in mind
- Ergonomic handpiece improves operator's comfort during extended scaling
- Small footprint minimises counter space requirements
- BioSonic Inserts - variety of most popular tip designs in both 25 kHz and 30 kHz
- Multi-directional foot pedal for easy operation

BioSonic Inserts and SuperSoft Inserts

- Maximum comfort in popular tip designs
- SuperSoft cushioned non-slip silicone grip
- Greater tactile sensitivity and rotational control

W-US100R240 US100R Ultrasonic Scaler

BioSonic S1 Piezo Scaler **COLTENE**

**2 YEAR
WARRANTY!**

- Digitally controlled, automatic frequency tracking ensures unit will consistently work at the best frequency
- Re-usable metal filter traps debris from entering unit, allowing efficient water flow
- Handpiece is made from titanium alloy, making it extremely durable and autoclavable
- Three Pre-Set Options: General Scaling, Periodontal and Endodontic procedures
- Ten unique power settings

BioSonic Piezo Inserts

- 4 tip categories:
 - General Scaling Tips
 - Periodontic Tips
 - Endodontic Tips
 - Cavity Preparation Tips
- 24 different tip shapes available
