CERAMIC PRIMER II

A specialised primer for bonding to all aesthetic indirect restorations.

CERAMIC PRIMER II allows strong resin adhesion to:

- Feldspathic ceramics
- Lithium disilicate ceramics
- Zirconia
- Alumina
- Hybrid ceramics (eg CERASMART)
- Composite

CERAMIC PRIMER II is designed to create a strong bond between all aesthetic indirect restorations and resin-based cements during luting procedures or repair of direct composites.

CERAMIC PRIMER II features GC's advanced silane and proven phosphoric acid ester monomer technologies, in an innovative single bottle delivery formulated for stability and durable adhesion.

- Fast & easy application
- Single bottle delivery means no mixing of components is required
- No waiting time after application; simply apply and dry
- High bond strengths with excellent durability to aesthetic materials
- Stable formulation; no need for refrigeration
- 2 year shelf life

Patent Pending

FIRM SQUEEZE
RELEASES HARDENED STONE

VACUUM MIXING

EASY ACCESS

NEW!

Flexible Vac-U-Mixer

FLEXIBLE BOWL FOR MIXING INVESTMENTS
AND GYPSUMS UNDER VACUUM

Few things frustrate model technicians more than stone that has hardened in an expensive bowl. They must scrape the bowl manually, often damaging it beyond use. Many times, the hardened stone can't be removed at all.

Enter the revolutionary Flexible Vac-U-Mixer for the Vacuum Power Mixer, Combination Unit and VPM2. With just a firm squeeze, the technician can crack and release a majority of the hardened stone without damaging the bowl.

THE FLEXIBLE VAC-U-MIXER ADVANTAGE

- Easy clean up
- First ever flexible bowl for vacuum mixing – Higher impact resistance than a standard mixing bowl
- Visual indicators of the max fill line – Prevents overfilling the bowl which can result in damage to mixing unit
- Larger opening for easier hand access – Contoured for easy spatula access
- 350 g bowl – Lid & Paddle Assembly included

From \$456.00
