Revision: 03.08.2023

**Trade name: Peak™- ZM**

(Contd. of page 2)

- **After eye contact:**  
*Rinse opened eye for several minutes under running water. If symptoms persist, consult a doctor.*
- **After swallowing:**  
*Do NOT induce vomiting.*  
*If vomiting does occur, have victim lean forward to prevent aspiration.*  
*Rinse mouth with water.*  
*Seek medical treatment.*  
*Never give anything by mouth to an unconscious person.*
- **Information for doctor:**
- **Most important symptoms and effects, both acute and delayed**  
*Symptoms vary with alcohol level of the blood. Mild alcohol intoxication occurs at blood levels between 0.05-0.15%. Approximately 25% of individuals show signs of intoxication at these levels. Above 0.15% the person is definitely under the influence of ethanol; 50-95% of individuals are clinically intoxicated at these levels. Severe poisoning occurs when the blood is ethanol level is 0.3- 0.5%. Above 0.5% the individual will be comatose and death can occur. The unabsorbed ethanol should be removed by gastric lavage after intubating the patient to prevent aspiration. Avoid the use of depressant drugs or the excessive administration of fluids.*
- **Indication of any immediate medical attention and special treatment needed**  
*No further relevant information available.*

### 5 Fire Fighting Measures

- **Suitable extinguishing agents:**  
*Water fog*  
*Alcohol resistant foam*  
*Water spray*  
*Carbon dioxide*  
*Dry Chemical*
  - **For safety reasons unsuitable extinguishing agents:** *Water with full jet*
  - **Special hazards arising from the substance or mixture**  
*Carbon monoxide (CO)*  
*May produce a floating fire hazard.*  
*Static ignition hazard can result from handling and use.*  
*Vapors may travel to source of ignition and flash back.*  
*Vapors may settle in low or confined spaces.*
- Alcohols burn with a pale blue flame which may be extremely hard to see under normal lighting conditions. Personnel may only be able to feel the heat of the fire without seeing flames. Extreme caution must be exercised in fighting alcohol fires. Fight fire from maximum distance or use unmanned hose holders or monitor nozzles. Cool containers with flooding quantities of water until well after fire is out. Withdraw immediately in case of rising sound from venting safety devices or discoloration of tank. Always stay away from tanks engulfed in fire.*
- **Protective equipment:**  
*Wear self-contained respiratory protective device.*  
*Wear fully protective suit.*
  - **Additional information** *Cool endangered receptacles with water spray.*

### 6 Accidental Release Measures

- **Personal precautions, protective equipment and emergency procedures**  
*Do not inhale vapors, mist or gas. Ensure adequate ventilation. Remove all sources of ignition. Evacuate personnel to safe areas. Beware of vapors accumulating to form explosive concentrations. Vapors can accumulate in low areas.*  
*Wear protective equipment. Keep unprotected persons away.*

· **Personal protective equipment:**

· **General protective and hygienic measures:**

Observe good industrial hygiene practices.

Ensure that washing facilities are available at the work place.

Electrical equipment should be grounded and confirm to applicable electrical code.

When using do not smoke.

Keep away from foodstuffs, beverages and feed.

Immediately remove all soiled and contaminated clothing.

Wash hands before breaks and at the end of work.

Avoid contact with the eyes and skin.

· **Respiratory protection:**

Where risk assessment shows air-purifying respirators are appropriate use a full-face respirator with multi-purpose combination (US) or type ABEK (EN 14387) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer exposure use self-contained respiratory protective device.

· **Protection of hands:**

Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product.

Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices.

Wash and dry hands.

Protective gloves

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.

Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture.

Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

· **Material of gloves**

The selection of suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

· **Penetration time of glove material**

The exact breakthrough time has to be found out by the manufacturer of the protective gloves and has to be observed.

· **Eye protection:**

Maintain eye wash fountain and quick-drench facilities in work area.

Use equipment approved by appropriate government standards, such as NIOSH (US) or EN166 (EU)

Face protection

Use chemical safety goggles and/or a full face shield where splashing is possible.

Tightly sealed goggles

· **Body protection:**

Choose body protection according to the amount and concentration of the dangerous substance at the work place.
